

H3: MOLEFI SEPETLA

Molefi Sepetla is a farmer who grows vegetables such as tomatoes, spinach, garlic, and sometimes maize and beans.

He started growing vegetables in his backyard in 2013 and in 2015, he installed a 3m x 3m shade net where his production increased noticeably. He plants about 1.8 acres. He produces about 870 boxes of tomatoes, 20000 heads of

cabbage, 780 buckets of green pepper, 10000 buckets of garlic yearly.

He received a grant from Small-holder Agriculture Development Project (SADP) that financed a large grow tunnel of 10m x 30m among other things. He produces around 879 boxes of tomatoes and 3 500 bunches of spinach in a year in this space.

He met SADP in 2017 which assisted with tunnels since he had bought degraded land and rehabilitated it, hence, increasing his growing space.

He already has existing market such as Saverite, Salemane Fruits & veg, Caterers and vendors.
